## SUMMARY

A seasoned professional web developer with real-world experience creating products and technology-based solutions to problems. During the last several years, I have focused on building websites and applications (front-end and back-end) using Angular, React, Vue and Node.js. I have worked on SaaS/CRM/SPA/eCommerce/FinTech apps, web-services, RESTful-APIs and responsive UI/UX. My major strength is that I rapidly get up to speed with the existing built-in code base/project and develop new features according to best practices but always keep an eye on the client's needs.

## EDUCATION HISTORY

### University of Toronto

*Bachelor's degree, Computer Science |  
2007 – 2012*
